| <b>Contributors</b>   | xiii     |
| <b>Introduction</b>   | xix      |
| Combustion Science and Technology . . . . .   | xix      |
| Pollutants and Environment . . . . .  | xxii     |
| <b>Part One    Combustion Science and Technology</b>  | <b>1</b> |
| GENERATION AND REDUCTION OF REACTION<br>MECHANISMS RELEVANT TO COMBUSTION IN TURBINES . . . . .                             | 3        |
| <i>J. Warnatz</i>   |          |
| 1    Introduction . . . . .   | 3        |
| 2    Oxidation of Small Hydrocarbons . . . . .  | 4        |
| 3    Oxidation of Large Aliphatic Hydrocarbons . . . . .  | 5        |
| 4    Automatic Reaction Mechanism Generation . . . . .  | 6        |
| 5    Oxidation of Aromatic Hydrocarbons . . . . .   | 7        |
| 6    Automatic Reaction Mechanism Reduction . . . . .   | 10       |
| Acknowledgments . . . . .   | 15       |
| References . . . . .  | 15       |
| INHIBITION OF COMBUSTION OF HYDROGEN-AIR<br>MIXTURES AT DIFFERENT MECHANISMS OF TERMINATION<br>OF REACTION CHAINS . . . . . | 17       |
| <i>V. V. Azatyan, A. A. Borisov, V. I. Kalachev, V. V. Masalova,<br/>    A. E. Mailkov, and K. Ya. Troshin</i>              |          |
| 1    Introduction . . . . .   | 17       |
| 2    Experimental . . . . .   | 20       |
| 3    Results and Discussion . . . . .   | 22       |
| 4    Concluding Remarks . . . . .   | 28       |
| Acknowledgments . . . . .   | 28       |
| References . . . . .  | 29       |

| NOVEL APPROACH TO ENHANCE CHAIN REACTIONS IN<br>COMBUSTIBLE MIXTURES BY RESONANCE LASER RADIATION                   | 31 |
| <i>A. M. Starik, N. S. Titova, and B. I. Loukhovitski</i>   |    |
| 1 Introduction  | 31 |
| 2 Formulation of the Problem  | 32 |
| 3 Kinetic Model   | 34 |
| 4 Basic Equations   | 36 |
| 5 Initiation of Combustion in Quiescent $H_2-O_2-H_2O(O_3)$<br>Mixture by IR-Laser Radiation                        | 39 |
| 6 Ignition in Supersonic Flow Behind the Oblique Shock  | 45 |
| 7 Concluding Remarks  | 48 |
| Acknowledgments   | 49 |
| References  | 49 |
| LASER-SPARK INDUCED IGNITION AND FLAME CONTROL<br>IN LEAN METHANE-AIR MIXTURES. ANALYSIS BY OH-PLIF<br>MEASUREMENTS | 51 |
| <i>H. El-Rabii and J.-C. Rolon</i>  |    |
| 1 Introduction  | 51 |
| 2 Breakdown Wave and Plasma Dimensions  | 53 |
| 3 Experimental Setup  | 56 |
| 4 Imaging Technique   | 59 |
| 5 Energy Measurement Experiments  | 59 |
| 6 Planar Laser-Induced Fluorescence Measurements  | 63 |
| 7 Concluding Remarks  | 65 |
| Acknowledgments   | 66 |
| References  | 66 |
| STUDIES OF TWO-STAGE HOMOGENEOUS COMBUSTION<br>OF METHANE-AIR MIXTURE   | 69 |
| <i>Yu. Ya. Buriko and V. F. Goltsev</i>   |    |
| 1 Introduction  | 69 |
| 2 Modeling of Two-Stage Combustion  | 70 |
| 3 Results and Discussion  | 73 |
| 4 Concluding Remarks  | 77 |
| Acknowledgments   | 78 |
| References  | 78 |
| STUDY OF PLASMA-ASSISTED COMBUSTION USING<br>OPTICAL DIAGNOSTICS  | 79 |
| <i>D. Packan, D. Messina, J. Bonnet, P. Vervisch, F. Grisch,<br/>and B. Attal-Tretout</i>                           |    |
| 1 Introduction  | 79 |

|  |   |     |
|--|---|-----|
| 2  | Experimental Setup . . . . .  | 79  |
| 3  | Attachment of a Lifted Methane Flame with a Plasma . . . . .                                    | 83  |
| 4  | Emission Spectrum of a Propane Discharge . . . . .  | 84  |
| 5  | Concluding Remarks . . . . .  | 86  |
|  | Acknowledgments . . . . .   | 86  |
| IGNITION AND COMBUSTION OF SUPERRICH METHANE MIXTURES WITH AIR AND OXYGEN. SYNTHESIS OF SYN-GAS              |   | 87  |
| <i>A. A. Borisov, V. P. Karpov, G. G. Politenkova, K. Ya. Troshin, I. V. Bilera, and Yu. A. Kolbanovskii</i> |   |     |
| 1  | Introduction . . . . .  | 87  |
| 2  | Thermodynamic and Kinetic Simulation of Partial Methane Oxidation with Air and Oxygen . . . . . | 88  |
| 3  | Physicochemical Parameters of Partial Methane Oxidation in Flames . . . . .                     | 92  |
| 4  | Syn-Gas Synthesis in Chemical Reactors Based on Power-Producing Installations . . . . .         | 100 |
| 5  | Concluding Remarks . . . . .  | 103 |
|  | Acknowledgments . . . . .   | 103 |
|  | References . . . . .  | 103 |
| STOCHASTIC SCALAR MIXING MODELS ACCOUNTING FOR TURBULENCE INTERMITTENCY . . . . .                            |   | 105 |
| <i>O. Soulard, V. Sabel'nikov, M. Gorokhovski, and N. Baricault</i>  |   |     |
| 1  | Introduction . . . . .  | 105 |
| 2  | Derivation of EIEM and EL Models . . . . .  | 106 |
| 3  | Scalar Mixing at Homogeneous Turbulence . . . . .   | 109 |
| 4  | Droplet Modeling . . . . .  | 114 |
| 5  | Concluding Remarks . . . . .  | 115 |
|  | References . . . . .  | 116 |
| MODELING OF DROP VAPORIZATION AND COMBUSTION WITH REGARD FOR SPRAY EFFECTS . . . . .                         |   | 117 |
| <i>S. M. Frolov, V. Ya. Basevich, A. A. Belyaev, V. S. Posvyanskii, and V. A. Smetanyuk</i>                  |   |     |
| 1  | Introduction . . . . .  | 117 |
| 2  | Formulation . . . . .   | 118 |
| 3  | Results and Discussions . . . . .   | 121 |
| 4  | Concluding Remarks . . . . .  | 129 |
|  | Acknowledgments . . . . .   | 129 |
|  | References . . . . .  | 129 |

INFLUENCE OF DROPLET CONCENTRATION ON THE  
DYNAMICS AND EVAPORATION OF A MONODISPERSE  
STREAM OF DROPLETS IN EVAPORATION REGIME . . . . . 133

*A. Atthasit, N. Doué, Y. Biscos, G. Lavergne, and A. Berlemont*

|                                    |     |
|------------------------------------|-----|
| Nomenclature . . . . .             | 133 |
| 1 Introduction . . . . .           | 134 |
| 2 Experimental Setup . . . . .     | 137 |
| 3 Measuring Techniques . . . . .   | 139 |
| 4 Results and Discussion . . . . . | 141 |
| 5 Concluding Remarks . . . . .     | 147 |
| References . . . . .               | 149 |

EXCITATION OF EXPLOSION IN LARGE VOLUME  
BY LOW-VELOCITY DETONATION WAVES . . . . . 151

*Manzhalei V. I.*

|                                    |     |
|------------------------------------|-----|
| 1 Introduction . . . . .           | 151 |
| 2 Experiment . . . . .             | 154 |
| 3 Results of Experiments . . . . . | 155 |
| 4 Ignition Criterion . . . . .     | 156 |
| 5 Concluding Remarks . . . . .     | 157 |
| Acknowledgments . . . . .          | 158 |
| References . . . . .               | 158 |

**Part Two     Pollutants and Environment** . . . . . 159

DETAILED KINETIC MODELING OF SOOT FORMATION  
DURING SHOCK TUBE PYROLYSIS AND OXIDATION  
OF FUEL-RICH HYDROCARBON-AIR MIXTURES . . . . . 161

*I. Naydenova, M. Nullmeier, P.A. Vlasov, and J. Warnatz*

|   |     |
|---|-----|
| 1 Introduction . . . . .  | 161 |
| 2 Characteristic Features of Soot Formation Process<br>and Soot Particles . . . . .                               | 163 |
| 3 Gas-Phase Mechanism of Hydrocarbon Pyrolysis,<br>Formation of Polyaromatic Hydrocarbons, and Polyynes . . . . . | 165 |
| 4 Reactions of Soot Precursors and Solid Soot Particles . . . . .   | 167 |
| 5 Discrete Galerkin Method . . . . .  | 168 |
| 6 Results and Discussion . . . . .  | 170 |
| 7 Concluding Remarks . . . . .  | 177 |
| Acknowledgments . . . . .   | 177 |
| References . . . . .  | 178 |

---

|   |     |
|---|-----|
| LASER MASS SPECTROMETRY OF POLYCYCLIC AROMATIC<br>HYDROCARBONS FROM WOOD GASIFICATION . . . . .   | 181 |
| <i>K. Tönnies, Y. Neubauer, C. Kühnert, and F. Behrendt</i>   |     |
| 1 Introduction . . . . .  | 181 |
| 2 Materials and Methods . . . . .   | 182 |
| 3 Concluding Remarks . . . . .  | 188 |
| Acknowledgments . . . . .   | 189 |
| References . . . . .  | 189 |
| PHYSICOCHEMICAL FUNDAMENTALS AND TECHNOLOGY<br>OF NONPOLLUTING BURNING OF TOXIC WASTE<br>IN A REACTOR BASED ON A LIQUID-PROPELLANT ENGINE . . . . . | 191 |
| <i>I. V. Biler, Yu. A. Kolbanovskii, S. K. Petrov, N. A. Plate,<br/>and I. V. Rossikhin</i>   |     |
| 1 Introduction . . . . .  | 191 |
| 2 On General Peculiarities of Destruction of Toxic Waste<br>by Incineration Technology . . . . .  | 192 |
| 3 Investigations into Destruction of Toxic Compounds . . . . .  | 197 |
| 4 Concluding Remarks . . . . .  | 204 |
| Acknowledgments . . . . .   | 204 |
| References . . . . .  | 204 |
| FORMATION OF SOOT AND METAL OXIDE CHARGED<br>AGGREGATES OF NANOPARTICLES BY COMBUSTION<br>AND PYROLYSIS . . . . .                                   | 207 |
| <i>V. V. Karasev, O. G. Glotov, A. M. Baklanov, N. A. Ivanova,<br/>A. R. Sadykova, and A. A. Onischuk</i>   |     |
| 1 Introduction . . . . .  | 207 |
| 2 Experimental Study . . . . .  | 209 |
| 3 Results . . . . .   | 212 |
| 4 Discussion . . . . .  | 220 |
| 5 Concluding Remarks . . . . .  | 224 |
| Acknowledgments . . . . .   | 225 |
| References . . . . .  | 225 |
| OFF-LINE ANALYSIS OF AEROSOLS: EXPLORING<br>HETEROGENEOUS CHEMISTRY OF INDIVIDUAL<br>ATMOSPHERIC PARTICLES . . . . .                                | 229 |
| <i>A. Laskin, J. P. Cowin, M. J. Iedema, and D. J. Gaspar</i>   |     |
| 1 Introduction . . . . .  | 229 |
| 2 Experimental Techniques . . . . .   | 230 |
| 3 Results and Discussion . . . . .  | 231 |
| 4 Concluding Remarks . . . . .  | 243 |

|   |            |
