Chapter One AERODYNAMICS **1**

CHAPTER Background 2

DYNAMICS OF MOLECULES IN A SUPERCOOLED WATER NANOPARTICLE DURING THE ICE ACCRETION ON THE AIRCRAFT SURFACE
I. A. Amelyushkin and A. L. Stasenko 3

1 Introduction 3
2 Physical Model, Simulation Conditions 5
3 Presentation of Macroparameters in Terms of Nanoparameters 6
4 Particulate Coagulation and Breakup 11
5 Droplet Approaching and Impingement upon a "Rigid" Body 11
6 Experimental Verification of the Results. An Inverse Problem 16
7 Concluding Remarks 18
Acknowledgments 19
References 19

HELICOPTER FUSELAGE DRAG — COMBINED COMPUTATIONAL FLUID DYNAMICS AND EXPERIMENTAL STUDIES
A. Batrakov, A. Kusyumov, S. Mikhailov, V. Pakhov, A. Sungatullin, M. Valeev, V. Zherekhov, and G. Barakos 21

1 Introduction 21
2 Computational Fluid Dynamics Mesh Generation 23

3 Prediction of Aerodynamic Force Coefficients 24
4 Distributed Flow Parameters 25
5 Concluding Remarks and Future Work 31
Acknowledgments 31
References 31

AERODYNAMIC PERFORMANCE OF THE DeSiReH HIGH-LIFT LAMINAR WING AT FREE FLIGHT AND ETW IN-TUNNEL CONDITIONS
S. Bosnyakov, E. Kazhan, I. Kursakov, S. Matyash, S. Mikhaylov, and A. Lysenkov 33
1 Introduction 33
2 Description of the Methodology for the Computational Tools 34
3 Computational Setup 35
4 Results 39
5 Concluding Remarks 43
Acknowledgments 44
References 44

CALCULATIONS OF UNSTEADY FLOWS AROUND HIGH-LIFT CONFIGURATIONS BASED ON A ZONAL APPROACH
S. Bosnyakov, I. Kursakov, S. Mikhaylov, and V. Vlasenko . . . 45
1 Introduction 45
2 Method 46
3 Tests for EUROPIV2 Airfoil 52
4 Calculations of "Wing-Fuselage" Model 60
5 Concluding Remarks 65
References 66

IMPROVEMENT OF THE CRUISE PERFORMANCES OF A WING BY MEANS OF AERODYNAMIC OPTIMIZATION. VALIDATION WITH A FAR-FIELD METHOD
J. Jiménez-Varona and J. Ponsin Roca 67
1 Introduction 67
2 *CIRCE* Code: Description 68
3 Far-Field Drag Tool Description 76
4 Prototype Aircraft 78

5 Concluding Remarks 86
Acknowledgments 87
References 87

CALCULATION OF TUMBLING BOUNDARIES OF A GENERIC WING-ONLY AIRLINER
A. Khrabrov and M. Sidoryuk 89

Nomenclature 89
1 Introduction 89
2 Aerodynamic Model 90
3 Calculation of Tumbling 91
4 Concluding Remarks 98
Acknowledgments 98
References 98

AERODYNAMIC ANALYSIS OF A HELICOPTER FUSELAGE WITH ROTATING ROTOR HEAD
R. Reß, M. Grawunder, and Ch. Breitsamter 99

Nomenclature 99
1 Introduction 100
2 Wind Tunnel Testing 100
3 Results 104
4 Concluding Remarks and Outlook 110
Acknowledgments 110
References 110

Chapter Two EXPERIMENTAL FACILITIES 111

CHAPTER Background 112

OFF-STAGNATION POINT TESTING IN PLASMA FACILITY
A. Viladegut and O. Chazot 113

1 Introduction 113
2 The Off-Stagnation Point Methodology 114
3 VKI Facilities 115
4 Computational Fluid Dynamics Analysis 117
5 Testing Campaign 119
6 Concluding Remarks 121
References 122

EXPERIMENTAL INVESTIGATION OF A NEWLY DESIGNED SUPERSONIC WIND TUNNEL
J. Wu and R. Radespiel 123

1 Introduction 123
2 Experimental Apparatus 125
3 Experimental Methods 127
4 Experimental Results 130
5 Concluding Remarks 143
References 143

Chapter Three FLOW CONTROL 145

CHAPTER Background 146

THE EFFECTS OF ACTUATION FREQUENCY ON THE SEPARATION CONTROL OVER AN AIRFOIL USING A SYNTHETIC JET
Y. Abe, K. Okada, T. Nonomura, and K. Fujii 147

1 Introduction 147
2 Problem Settings 149
3 Computational Approach 150
4 Effect of Actuation Frequency F^+ on Separation Control 154
5 Mechanism of Separation Control Focusing on Turbulent Mixing 159
6 Concluding Remarks 166
Acknowledgments 167
References 167

ON THE POSSIBILITY OF LAMINAR FLOW CONTROL ON A SWEPT WING BY MEANS OF PLASMA ACTUATORS
S. L. Chernyshev, A. P. Kuryachii, S. V. Manuilovich, D. A. Rusyanov, and V. V. Skvortsov 169

1 Introduction 169
2 Numerical Simulation of Dielectric Barrier Discharge Actuator System 171
3 Boundary Layer Calculation 179
4 Calculations of Cross-Flow Stability 185
5 Concluding Remarks 188
Acknowledgments 188
References 188

INVESTIGATION OF FLOW SEPARATION CONTROL BY NANOSECOND PULSED DIELECTRIC BARRIER DISCHARGE ACTUATORS
N. Grech, P. Leyland, Ph. Peschke, and P. Ott 191

Nomenclature 191
1 Introduction 192
2 Experimental Setup 193
3 Results 198
4 Concluding Remarks 208
References 209

INSTABILITY WAVE CONTROL IN TURBULENT JET BY ACOUSTICAL AND PLASMA ACTUATORS
V. F. Kopiev, I. V. Belyaev, G. A. Faranosov, V. A. Kopiev, N. N. Ostrikov, M. Yu. Zaytsev, Yu. S. Akishev, M. E. Grushin, N. I. Trushkin, V. A. Bityurin, A. I. Klimov, I. A. Moralev, I. A. Kossyi, N. K. Berezhetskaya, and M. I. Taktakishvili 211

1 Introduction 211
2 Experimental Setup 213
3 Experimental Verification of the Feasibility to Control the Artificially Exited Instability Wave by External Acoustic Action 220
4 Experimental Verification of the Possibility to Control Artificial Instability Wave by Plasma Actuators 223
5 Concluding Remarks 227
Acknowledgments 227
References 227

NUMERICAL AND EXPERIMENTAL INVESTIGATION OF SLOT-BLOWN AIR OVER A CYLINDER
W. Runge, F. Buysschaert, J. Hayez, F. Carlier, H. Antoine, P. Hendrick, G. Dimitriadis, and G. Degrez 229

1 Introduction 229
2 Experimental Results 236
3 Computational Results 238
4 Concluding Remarks 243
Acknowledgments 244
References 244

Chapter Four INLETS, NOZZLES, AND INTERNAL FLOWS 245

CHAPTER Background 246

DEVELOPMENT OF ADVANCED COMPUTATIONAL FLUID DYNAMICS TOOLS AND THEIR APPLICATION TO SIMULATION OF INTERNAL TURBULENT FLOWS
V. N. Emelyanov, A. G. Karpenko, and K. N. Volkov 247

1 Introduction 247
2 Governing Equations 250
3 Numerical Method 252
4 Programming Model 252
5 Parallelization Technique 256
6 Flux Calculations 259
7 Results and Discussion 261
8 Concluding Remarks 267
Acknowledgments 267
References 268

FLOW SEPARATION IN OUT-OF-ROUND NOZZLES, A NUMERICAL AND EXPERIMENTAL STUDY
C. Génin, R. Stark, and S. Jack 269

1 Introduction 269
2 Literature Study 272
3 Contour Deformation Methods 274
4 Numerical Method 276
5 Experimental Method 276
6 Validation 277
7 Effects of Ovalization 279
8 Concluding Remarks 281
Acknowledgments 281
References 282

ANALYSIS OF THE REVERSE JET INFLUENCE ON PARTICLE INGESTION AT THE ENGINE INLET
S. Yu. Krasheninnikov and D. E. Pudovikov 283

1 Introduction 283
2 Particle Accumulation in the Vortex 284

3 Reverse Jet Propagation 285
4 Concluding Remarks 293
References 294

Chapter Five JETS AND WAKES 295

CHAPTER Background 296

EXPERIMENTAL AND NUMERICAL STUDY OF PULSATING TRANSVERSAL JETS
M. A. Goldfeld, N. N. Fedorova, I. A. Fedorchenko, G. A. Pozdnyakov, K. Yu. Timofeev, and Yu. V. Zhakharova . . . 297

1 Introduction 297
2 Experimental Setup and Apparatus 299
3 Mathematical Model and Numerical Approach 300
4 Problem Statement and Boundary Conditions 302
5 Results and Discussion 304
6 Concluding Remarks 309
Acknowledgments 309
References 309

COMBINED EXPERIMENTAL AND NUMERICAL INVESTIGATION OF A TRANSONIC SPACE LAUNCHER WAKE
S. Scharnowski, V. Statnikov, M. Meinke, W. Schröder, and C. J. Kähler . . . 311

1 Introduction 312
2 Experimental Approach 312
3 Computational Approach 314
4 Results 317
5 Concluding Remarks 326
Acknowledgments 327
References 327

EXPERIMENTAL AND NUMERICAL INVESTIGATION OF THE TURBULENT WAKE FLOW OF A GENERIC SPACE LAUNCHER CONFIGURATION
V. Statnikov, D. Saile, J.-H. Meiß, A. Henckels, M. Meinke, A. Gülhan, and W. Schröder . . . 329

Nomenclature 330
1 Introduction 330
2 Geometry and Flow Conditions 331

3 Experimental Setup 333
4 Computational Approach 333
5 Results 336
6 Concluding Remarks 347
Acknowledgments 348
References 348

Chapter Six NONEQUILIBRIUM AND RAREFIED FLOWS 351

CHAPTER Background 352

EXPERIMENTAL CHARACTERIZATION OF ULTRAVIOLET RADIATION OF AIR IN A HIGH ENTHALPY PLASMA TORCH FACILITY
C. J. Casses, P. J. Bertrand, C. M. Jacobs, M. E. Mac Donald, and Ch. O. Laux 353

1 Introduction 353
2 Experimental Setup 355
3 Results 357
4 Concluding Remarks 367
References 368

COMPUTATIONAL ANALYSIS OF A RAREFIED HYPERSONIC FLOW OVER COMBINED GAP/STEP GEOMETRIES
P. H. M. Leite and W. F. N. Santos 369

1 Introduction 369
2 Computational Tool 372
3 Geometry Definition 373
4 Free-Stream and Flow Conditions 374
5 Computational Flow Domain and Grid 375
6 Computational Results and Discussion 377
7 Concluding Remarks 391
Acknowledgments 392
References 392

ANALYTICAL MODEL OF TRANSLATIONAL NONEQUILIBRIUM FLOW WITH INTERNAL DEGREES OF FREEDOM
I. I. Lipatov, M. M. Kuznetsov, and L. V. Smotrova 395

1 Introduction 395
2 Equations 395

3 Results 399
Acknowledgments 400
References 400

A BLUNTED CONE IN A SUPERSONIC HIGH-ENTHALPY NONEQUILIBRIUM AIR FLOW
V. I. Sakharov, V. V. Shtapov, E. B. Vasilevskiy, and B. E. Zhestkov 401

1 Introduction 401
2 Experimental Equipment 403
3 Results of Numerical Investigations of the Flow Around the Model 409
4 Experimental Investigation of the Heat Flux and Pressure Distributions over the Model Surface 412
5 Concluding Remarks 415
Acknowledgments 415
References 415

Chapter Seven SHOCK WAVES 417

CHAPTER Background 418

INFLUENCE OF LEADING EDGE BLUNTNESS ON HYPERSONIC FLOW IN A GENERIC INTERNAL-COMPRESSION INLET
V. Borovoy, I. Egorov, V. Mosharov, V. Radchenko, A. Skuratov, and I. Struminskaya 419

1 Introduction 419
2 Experimental Model. Flow Characteristics 420
3 Experimental Methods 422
4 Flow Schemes 423
5 Influence of Cowl Presence on the Flow Between the Wedges 424
6 Influence of Plate Bluntness on Heat Transfer and Channel Blocking 427
7 Influence of Cowl Bluntness on Heat Transfer and Channel Blocking 429
8 Reynolds Number Influence on the Flow in the Inlet with Blunted Plate and Cowl 432
9 Concluding Remarks 433
Acknowledgments 434
References 434

A NEW CONFIGURATION OF IRREGULAR REFLECTION OF SHOCK WAVES
L. G. Gvozdeva and S. A. Gavrenkov 437

1 Introduction 437
2 Analytical Studies 439
3 Numerical Study 444
4 Concluding Remarks 451
Acknowledgments 451
References 451

CONICAL FLOWS NEAR V-SHAPED WINGS WITH SHOCK WAVES ATTACHED ON LEADING EDGES
F. A. Maximov, N. A. Ostapenko, and M. A. Zubin 453

1 Introduction 453
2 Calculation Method 454
3 The Calculations Results of Flow over a Wing with a Slip Angle. Comparison with Experimental Data 457
4 Some Calculations Results of Symmetric Flow near V-Shaped Wings at Mach 6 462
5 On the Criterion of Nonviscous Eddy Structures Formation in the Shock Layer 467
6 Summary 473
Acknowledgments 473
References 473

WAVE DRAG REDUCTION DUE TO A SELF-ALIGNING AERODISK
Ch. Schnepf, O. Wysocki, and E. Schülein 475

1 Introduction 475
2 Test Model Geometry and Computational Grid 478
3 Numerical Approach 480
4 Preliminary Investigations 481
5 Results 482
6 Concluding Remarks 486
References 487

Chapter Eight STABILITY AND TRANSITION 489

CHAPTER Background 490

PREDICTION OF LAMINAR–TURBULENT TRANSITION ON AN AIRFOIL AT HIGH LEVEL OF FREE-STREAM TURBULENCE
V. Chernoray 491

1 Introduction 491
2 Experimental and Numerical Setup 492
3 Results 498
4 Concluding Remarks 506
References 507

ON THE RELATIVE "RECEPTIVITY" OF TWO- AND THREE-DIMENSIONAL SUPERSONIC BOUNDARY LAYERS TO STATIONARY DISTURBANCES AT MACH 2
A. D. Kosinov, A. V. Panina, N. V. Semionov, and Yu. G. Yermolaev 509

1 Introduction 509
2 Experimental Setup 512
3 Results 514
4 Concluding Remarks 522
Acknowledgments 523
References 523

ON MODELING OF LAMINAR–TURBULENT TRANSITION IN SUPERSONIC FLOWS WITH ENGINEERING CORRELATIONS AND REYNOLDS-AVERAGED NAVIER–STOKES EQUATIONS
R. V. Kovalev, V. V. Kudryavtsev, and D. A. Churakov 525

1 Introduction 525
2 Engineering Algebraic Correlations for Transition Prediction 527
3 Transition Prediction Using Reynolds-Averaged Navier–Stokes Equations 533
4 Results of Laminar–Turbulent Transition Modeling on Cones in Supersonic Flow Using Engineering Correlations and Reynolds-Averaged Navier–Stokes Equations 539
5 Concluding Remarks 545
References 546

EFFECT OF THE LOCAL WALL COOLING/HEATING ON THE HYPERSONIC BOUNDARY LAYER STABILITY AND TRANSITION
A. Sidorenko, Yu. Gromyko, D. Bountin, P. Polivanov, and A. Maslov 549

1 Introduction 549
2 Wind Tunnel Experiments 550
3 Numerical Simulation 561
4 Concluding Remarks 567
Acknowledgments 568
References 568

STABILITY OF HIGH-SPEED BOUNDARY LAYER ON A SHARP CONE WITH LOCALIZED WALL HEATING OR COOLING
V. G. Soudakov, A. V. Fedorov, and I. V. Egorov 569

1 Introduction 569
2 Problem Formulation 570
3 Steady-State Solution with and without Heating/Cooling 572
4 Linear Stability Analysis 575
5 Direct Numerical Simulation 577
6 Comparison of Direct Numerical Simulation and Linear Stability Theory Results 580
7 Summary 583
Acknowledgments 584
References 584

EXPERIMENTAL METHODS OF THE STUDY OF VORTEX STRUCTURES EXCITED BY POINT INJECTION AT THE LEADING EDGE OF THE OBLIQUE WING
S. N. Tolkachev, V. N. Gorev, G. M. Zharkova, and V. N. Kovrizhina 585

1 Introduction 585
2 Investigation of the Oblique Wing Leading Edge 587
3 Generation and First Stages of Developing of Longitudinal Vortex Structures 593
4 Concluding Remarks 602
Acknowledgments 603
References 603

TRANSITIONAL FLOW STRUCTURE ON CLASSIC AND WAVY WINGS AT LOW REYNOLDS NUMBERS
I. Zverkov, V. Kozlov, and A. Kryukov 605
1 Introduction 605
2 Experimental Techniques 607
3 Wind Tunnel Data 611
4 Concluding Remarks 615
Acknowledgments 617
References 617
