Introduction	xiii
Chapter 1 Ignition and Combustion	1
Spontaneous Ignition of Hydrocarbon–Hydrogen–Air Mixtures <i>S. M. Frolov, S. N. Medvedev, V. Ya. Basevich, and F. S. Frolov</i>	3
Detailed Chemistry of Heavy Alkane Hydrocarbon Fuel Oxidation: Application to Combustion and Detonation of Gaseous and Liquid Fuels <i>V. Ya. Basevich, A. A. Belyaev, F. S. Frolov, S. M. Frolov, and S. N. Medvedev</i>	14
Plasma-Stimulated Mixing in High-Speed Flow <i>S. B. Leonov, Yu. I. Isaenkov, M. A. Shurupov, and D. A. Yarantsev</i>	26
Autoignitions of Methane at Intermediate and High Temperatures <i>V. V. Leschevich, V. V. Martynenko, O. G. Penyazkov, K. L. Sevrouk, S. I. Shabunya, V. Tangirala, and N. Joshi</i>	32
Self-Ignition and Combustion of Associated Petroleum Gas <i>A. A. Borisov, I. V. Biler, Yu. A. Kolbanovski, G. G. Politenkova, N. M. Rubtsov, and K. Ya. Troshin</i> ...	43
High-Temperature Autoignitions of Surrogate Diesel Fuels <i>O. G. Penyazkov, K. L. Sevrouk, V. Tangirala, and N. Joshi</i>	49
Combustion Features of Hydrogen/Synthesis-Gas-Containing Mixtures in Internal Combustion Engine <i>M. S. Assad and O. G. Penyazkov</i>	64
Influence of Halogenoalkanes on Shock Wave Propagation and Methane Ignition <i>A. V. Drakon, A. V. Emelianov, and A. V. Eremin</i>	70

Combustion Enhancement of Syngas–Air Mixture Through the Excitation of CO Molecule Vibrations by Resonance Laser Radiation <i>A. M. Starik, A. S. Sharipov, and N. S. Titova</i>	78
Plasma-Assisted Mechanism of Multistage Self-Ignition Onset <i>V. A. Bityurin and E. A. Filimonova</i>	83
The Role of Richtmyer–Meshkov Instability in Combustion Propagation due to Toroidal Electrical Discharge in Confined Region <i>I. S. Manuylovich and V. V. Markov</i>	90
Flame Propagation in Ethylene–Air Mixtures in Closed Tubes <i>C. Movileanu, D. Razus, V. Giurcan, and V. Gosa</i>	96
Shock-Induced Ignition of Fuel-Lean Gas Bubbles in Organic Liquids <i>K. Mitropetros and P. A. Fomin</i>	101
Simulation of Conditions for Ultrafast Chemical Reactions <i>V. N. Leitsin, M. A. Dmitrieva, and E. B. Eremkina</i>	113
Autoignitions of Iron Microparticles in High-Pressure Oxygen Atmosphere <i>V. V. Leschevich, O. G. Penyazkov, and J.-C. Rostaing</i>	119
Calculation of Nonstationary Burning Rate in Context of Phenomenological Theory <i>A. G. Korotkikh, V. A. Arkhipov, and S. S. Bondarchuk</i>	126
Evolution of Agglomerating Particles: Analysis of Experimental Data and Mathematical Modeling <i>V. A. Babuk and A. A. Nizyaev</i>	131
Chapter 2 Initiation of Detonation	143
Gradient Mechanism of Detonation Initiation Under Action of High-Voltage Nanosecond Discharge <i>A. E. Rakitin and A. Yu. Starikovskiy</i>	145
Transient Combustion Regimes in Closed Channels <i>M. F. Ivanov, A. D. Kiverin, and Yu. V. Rikov</i>	155
Modeling of Deflagration-to-Detonation Transition with Ignition-Temperature Kinetics <i>L. Kagan and G. Sivashinsky</i>	163

Modeling of Initiation of Gas Detonation <i>D. V. Voronin</i>	170
Nonreacting Investigations of a Pseudo-Orifice for the Purpose of Enhanced Deflagration-to-Detonation Transition <i>J. A. T. Gray, J. P. Moeck, and C. O. Paschereit</i>	176
Transient Fast Deflagration Modes in Methane–Air Mixtures <i>A. A. Borisov, S. M. Frolov, A. S. Koval', A. E. Mailkov, and V. A. Smetanyuk</i>	182
Detonation Initiation in Natural Gas–Air Mixture in a Tube with Focusing Nozzle <i>S. M. Frolov, V. S. Aksenov, and A. A. Skripnik</i>	196
Numerical Modeling of Shock Wave to Detonation Transition in Methane–Air Mixture in Tubewith Central Body <i>S. M. Frolov, I. O. Shamshin, A. V. Dubrovskii, and S. N. Medvedev</i>	204
Formation of Detonation Wave Driven by Energy of Carbon Condensation in C_3O_2 and C_2H_2 <i>A. V. Emelianov, A. V. Eremin, and V. E. Fortov</i>	213
Structure of the Blast Wave Front <i>S. N. Kulichkov and S. I. Kosyakov</i>	223
Chapter 3 Propagating Detonations	225
Chain-Thermal Explosion and Its Determining Role in Detonation of Gases <i>V. V. Azatyan</i>	227
Multidimensional Structure of Detonation in Tubes <i>V. A. Levin, I. S. Manuylovich, and V. V. Markov</i>	234
Modeling of Detonation Wave Front Structures in Methane Mixtures <i>A. V. Trotsyuk, P. A. Fomin, and A. A. Vasil'ev</i>	243
Numerical Modeling of Detonation Initiation and Propagation in Methane–Air Mixture Using High Performance Computing <i>I. V. Semenov, P. S. Utkin, I. F. Akhmedyanov, and M. Yu. Nemtsev</i>	254

Mathematical Modeling of Pulsating Detonation Wave Propagation Using Monotone Numerical Methods of Different Approximation Orders	261
<i>A. I. Lopato and P. S. Utkin</i>	
Heat Release Law and Detonation Behavior	269
<i>D. Desbordes, H.-N. Presles, F. Viro, and B. Khasainov</i>	
Underresolved Simulation of Large-Scale Confined Hydrogen–Air Detonations in the Rut Facility	292
<i>J. Hasslberger, L. R. Boeck, and T. Sattelmayer</i>	
Mechanism of Detonation Wave Inhibition in Hydrogen–Air Mixture	299
<i>I. S. Gordopolova</i>	
Detonation Propagation in Hydrogen–Air Mixtures with Concentration Gradients	306
<i>L. R. Boeck, F. M. Berger, J. Hasslberger, and T. Sattelmayer</i>	
Detonation Wave Structure at the Molecular Kinetic Level	315
<i>Ye. A. Bondar and M. S. Ivanov</i>	
Chapter 4 Pulse Detonations	327
Recent Test and Simulation Results Obtained on Pulsed and Continuous Detonation Wave Engines	329
<i>F. Falempin and B. Le Naour</i>	
Gaseous Monopropellants for Detonation Propulsion	334
<i>H.-N. Presles, F. Viro, B. A. Khasainov, and D. Desbordes</i>	
Developments in Ignition, Initiation, and Nozzles for Pulse Detonation Combustion	341
<i>J. O. Sinibaldi and C. M. Brophy</i>	
Experimental Studies of a Liquid Propane–Air Pulse Detonation Engine	362
<i>S. M. Frolov, V. S. Aksenov, V. S. Ivanov, and I. O. Shamshin</i>	
Numerical Studies of the Valveless-Scheme Pulse Detonation Engine in TsAGI	375
<i>V. V. Vlasenko and A. A. Shiryayeva</i>	

Numerical Study of Operation Process in a Model Device with Pulsed Chamber Inside a Duct <i>V. V. Vlasenko and A. A. Shiryaeva</i>	384
Thrust Performance of Air-Breathing Pulse Detonation Engine at Subsonic Flight at Different Altitudes <i>A. E. Zangiev, S. M. Frolov, and V. S. Ivanov</i>	394
A Prototype of Pulsed Detonation Burner Operating on Natural Gas <i>S. M. Frolov, V. S. Aksenov, K. A. Avdeev, A. A. Borisov, P. A. Gusev, V. S. Ivanov, A. S. Koval', S. N. Medvedev, V. A. Smetanyuk, F. S. Frolov, and I. O. Shamshin</i>	401
Free-Piston Pulse Detonation Engine <i>V. V. Golub, D. I. Baklanov, S. V. Golovastov, T. M. Falyakhov, and A. Yu. Mikushkin</i>	413
Aerodesign Methodology of a Supersonic Turbine for a Pulse Detonation Engine <i>G. Paniagua, J. P. Garcia-Galache, and J. M. Romero-Catala</i>	421
Supersonic Flow Turning in a Channel Exposed to Fluctuating Inlet Conditions <i>J. Sousa, O. Martinez, and G. Paniagua</i>	431
Investigation of Gas Detonation in Narrow Channels for Needleless Injection Devices <i>K. V. Ivanov, D. I. Baklanov, M. S. Krivokoritov, I. N. Tarasenko, and V. V. Golub</i>	433
Chapter 5 Continuous Detonations	441
Numerical Simulations of a Rotating-Detonation-Wave Engine Concept <i>K. Kailasanath and D. A. Schwer</i>	443
Experimental Studies of a Large-Scale Hydrogen–Air Continuous Detonation Combustor <i>S. M. Frolov, V. S. Aksenov, P. A. Gusev, V. S. Ivanov, S. N. Medvedev, and I. O. Shamshin</i>	449
Computational Studies of a Large-Scale Hydrogen–Air Continuous Detonation Combustor <i>A. V. Dubrovskii, S. M. Frolov, and V. S. Ivanov</i>	466

Use of the Adaptive Mesh Refinement for Continuous Detonation Simulation	478
<i>Yo. Eude and D. Davidenko</i>	
Ideal Performance of a Continuous Detonation Wave Rocket Engine Fed with Hydrogen–Oxygen Mixture	488
<i>D. Davidenko, Yo. Eude, and I. Gökalp</i>	
Numerical Study on Detailed Structure of Continuous Rotating Detonation Wave	497
<i>S. J. Liu, Z. Y. Lin, F. C. Zhuang, J. Zhou, and W. D. Liu</i>	
Domain of Existence of Continuous Detonation of a Hydrogen–Air Mixture in the Air Ejection Mode	513
<i>F. A. Bykovskii, S. A. Zhdan, and E. F. Vedernikov</i>	
Analysis of Continuous Detonation Wave Combustor Outlet Conditions	521
<i>J. Braun, B. H. Saracoglu, and G. Paniagua</i>	
Detonation Stabilization in a Supersonic Flow of a Combustible Gas Mixture in Plane Channels	529
<i>V. A. Levin and T. A. Zhuravskaya</i>	
Chapter 6 Heterogeneous and Condensed-Phase Detonations	535
Detonation of Liquid Fuel Sprays in Air	537
<i>B. Veyssiere, B. A. Khasainov, M. Mar, and M. A. Benmahammed</i>	
Initiation of Detonation in Aluminum–Oxygen Suspensions	539
<i>B. Veyssiere, B. A. Khasainov, C. A. Sturtzer, M. O. Sturtzer, and F. Viot</i>	
Characteristics and Criteria of Ignition of Aluminum Particle Suspensions in Detonation Processes	541
<i>A. V. Fedorov and T. A. Khmel</i>	
Numerical Simulation of Heterogeneous Detonation and Its Interaction with Nonreactive Particle Cloud	548
<i>A. V. Fedorov and Yu. V. Kratova</i>	
Modeling of Collisional Dynamics of Gas Particle Suspensions in Shock-Wave and Detonation Processes	561
<i>T. A. Khmel and A. V. Fedorov</i>	

Mathematical Modeling of Shock Wave–Dense Particles Bed Interaction Using Godunov Solver for Baer–Nunziato Equations <i>P. S. Utkin</i>	582
Magnetohydrodynamic Effects of Heterogeneous Detonations <i>V. S. Aksenov, K. A. Avdeev, F. S. Frolov, S. M. Frolov, V. S. Ivanov, S. N. Medvedev, and I. O. Shamshin</i>	590
Chapter 7 Equations of State	599
Equation of State for N ₂ and CO ₂ Shock Hugoniot <i>A. A. Anikeev, Yu. A. Bogdanova, S. A. Gubin, and S. B. Victorov</i>	601
Calculation of Detonation Parameters of High Explosives with Condensed Products <i>S. A. Gubin, I. V. Maklashova, and S. B. Victorov</i>	607
Theoretical Model of Equation-of-State for Binary Fluid and Analysis of the Choice of Unlike-Interaction Potential on Results of Calculations <i>Yu. A. Bogdanova, S. A. Gubin, A. A. Anikeev, and S. B. Victorov</i>	614
Effect of Turbulence near Detonation Limits <i>V. A. Veretennikov and V. S. Trofimov</i>	622
Numerical Study of Density Effect on JB-9014 Equation of State of Detonation Products <i>X. Yu, K. Huang, L. Wei, and M. Zheng</i>	627
Study on the Speed Waveform Evolution of Flyer Driven by Strong Detonation <i>W. Lan, Ch. Yongli, and Zh. Miao</i>	632
Theoretical and Numerical Study on the Air Shock Wave Driven by Spherical Assembling Detonation <i>Zh. Miao and H. Yong</i>	637
Author Index	640
