

CONTENTS

Evolutionary history, phylogeny and systematics of voles and lemmings (Arvicolinae, Myomorpha, Rodentia): Contribution from molecular data <i>N. I. Abramson</i>	1
miRNAs binding sites in mRNAs of maize transcription factor genes <i>A. N. Akimniyazova, R. Y. Niyazova, I. V. Pinsky, O. A. Berillo, S. B. Orazova, and A. T. Ivashchenko</i>	2
Bioinformatics tools in determination of hypothetical proteins' functional potential <i>E. I. Aksenova, O. L. Voronina, M. S. Kunda, A. N. Semenov, V. G. Lunin, and A. L. Gintsburg</i>	3
The origin of fungi and microsporidians <i>V. V. Aleoshin, K. V. Mikhailov, and S. A. Karpov</i>	4
Phylogenetic relationships in diverse superfamilies of eukaryotic transposable elements <i>I. R. Arkhipova, I. A. Yushenova, and F. Rodriguez</i>	5
Genetic characterization of trematodes <i>Haplospalanchnus pachysomus</i> (Eysenhardt, 1892) from Vietnam and <i>Provitellotrema crenimugilis</i> Pan, 1984 (Trematoda: Haplospalanchninae) from Russian Primorye Region <i>D. M. Atopkin, A. Yu. Nikitenko, and H. D. Ngo</i>	7
Genetic diversity and phylogenetic relationships of the Far-Eastern trematode <i>Skrjabinolecithum spasskii</i> Belous, 1954 (Digenea: Haploporidae) — a parasite of mugilid fishes <i>D. M. Atopkin, A. Yu. Nikitenko, and H. D. Ngo</i>	9
Genetic characterization of the <i>Notocotylus intestinalis</i> Tubangui, 1932 (Digenea: Notocotylidae) from the mollusks <i>Parafossarulus striatulus</i> Benson (Bithyniidae) and paraphyly of the genus <i>Notocotylus</i> <i>D. M. Atopkin, K. V. Rozhkovan, and H. D. Ngo</i>	10
Helitron-based genome scanning in cattle <i>A. V. Babii, S. N. Kovalchuk, V. I. Glazko, and G. Yu. Kosovsky</i>	11

Influence of recombination between different types of mobile genetic elements in the genomic loci flanked by inverted repeats of microsatellites on their polymorphism in horse <i>N. V. Bardukov and V. I. Glazko</i>	12
Metagenomic analysis of high kinetic mutations regions of bovine leukemia virus as a model for creating diagnostic new generation PCR systems <i>A. I. Bogomolov and A. E. Kalashnikov</i>	13
Molecular phylogeny for the cloned 18S rDNA sequences of sturgeon <i>G. N. Chelomina, K. V. Rozhkovan, S. A. Ivanov, and E. I. Rachek</i>	14
Novel algorithm for reconstruction of operon structure evolution <i>Z. S. Chervontseva and E. D. Stavrovskaya</i>	15
Phylogeny of the trematode <i>Diplostomum phoxini</i> (Faust, 1989) infected minnows (<i>Phoxinus phoxinus</i>) in Eurasia <i>G. G. Chrisanfova, S. K. Semyenova, and D. I. Lebedeva</i>	16
The molecular structure of evolutionary conservative retrotransposon <i>Bov-B</i> LINE in parthenogenetic lizards <i>Darevskia unisexualis</i> <i>S. A. Godakova, F. A. Osipov, G. A. Sevast'yanova, and V. I. Korchagin</i>	18
Possible recombination between two mitochondrial lineages in liver fluke <i>Fasciola hepatica</i> (Trematoda) <i>A. S. Guliaev and S. K. Semyenova</i>	19
ISSR and IRAP markers in revealing “standard gene pool” of breeds of horses <i>T. A. Erkenov, M. A. Elkina, and V. I. Glazko</i>	20
Molecular phylogeny of bryophytes: What is done and what is still to be done? <i>M. S. Ignatov</i>	21
Molecular phylogeny of Copepoda (Crustacea) with emphasis on symbiotic taxa <i>V. Ivanenko, M. Nikitin, K. V. Mikhailov, S. Moudrova, E. Romanova, G. Abizova, and V. V. Aleoshin</i>	22
Phylogeny of the genus <i>Spermophilus</i> and position Alashan ground squirrel (<i>Spermophilus alashanicus</i> Büchner, 1888) on the phylogenetic tree of Eurasian ground squirrels <i>S. Yu. Kapustina, O. V. Brandler, and Ya. Adiya</i>	23

Phylogenetic relationships between continental and island populations of sable (<i>Martes zibellina</i> L) <i>S. N. Kashtanov, G. R. Svisheva, I. G. Meschersky, S. L. Pishchulina, and V. V. Rozhnov</i>	24
Evolutionarily conserved features of the retained intron in alternative transcripts of the <i>nxf1</i> (nuclear export factor) genes in <i>Animalia</i> <i>S. F. Kliver, E. V. Golubkova, and L. A. Mamon</i>	25
Amplification of CYP9 family of P450 cytochrome in <i>Lasius niger</i> : A preadaptation to urban environments? <i>E. A. Konorov, M. A. Nikitin, K. V. Mikhailov, V. A. Scobeyeva, S. N. Lysenkov, M. Yu. Belenky, and S. V. Nuzhdin</i>	26
Placement of <i>Emericellopsis</i> -clade in order Hypocreales (Fungi, Ascomycota) <i>O. Konovalova, A. Zalevsky, and M. Logacheva</i>	27
Genetic polymorphism of ATP synthase α -subunit gene intron in Baikalian polychaetes of the genus <i>Manayunkia</i> (Sedentaria, Sabellidae) <i>M. V. Kovalenkova, T. A. Pudovkina, T. Ya. Sitnikova, and D. Yu. Sherbakov</i>	29
Nucleotide content of bovine genome fragments flanked by (AGC) _n microsatellite <i>S. N. Kovalchuk, T. T. Glazko, I. O. Petrova, A. V. Arkhipov, G. Yu. Kosovsky, and V. I. Glazko</i>	31
Evolution of virus vs. host: Comparative analysis of electrostatic properties of bacteriophage lambda genome elements <i>G. G. Krutinin, E. A. Krutinina, S. G. Kamzolova, and A. A. Osypov</i>	32
Electrostatics: A physical aspect of prokaryotic transcription factors and their binding sites coevolution <i>E. A. Krutinina, G. G. Krutinin, S. G. Kamzolova, and A. A. Osypov</i>	33
Analysis of the BCG substrains diversity formed by the human influence <i>M. S. Kunda, O. L. Voronina, E. I. Aksenova, A. N. Semenov, N. N. Ryzhova, V. G. Lunin, and A. L. Gintsburg</i>	34

Genetic differentiation of <i>Gladiolus tenuis</i> (Iridaceae) in connection with triploidy and sterility <i>N. A. Kutlunina, M. V. Permyakova, and A. Yu. Belyaev</i>	35
Genetic diversity of Apple stem pitting virus in Belarus <i>P. V. Kuzmitskaya and O. Yu. Urbanovich</i>	36
How many semicryptic species of mosses are still to be discovered? <i>O. I. Kuznetsova, M. S. Ignatov, and E. A. Ignatova</i>	37
<i>BoLA-DRB3</i> gene polymorphism as characteristic of immunological status in Russian cattle breeds <i>I. V. Lazebnaya, A. V. Perchun, O. E. Lazebny, and G. E. Sulimova</i>	38
Phylogeny of superfamily of the exchangeable apolipoproteins <i>A. V. Lizunov, S. V. Orlov, and A. P. Perevozchikov</i>	40
Plastome and nuclear ETS data in East European <i>Salicornia</i> (Amaranthaceae/Chenopodiaceae) phylogeny analysis <i>M. D. Logacheva, S. S. Beer, G. Kadereit, T. H. Samigullin, D. D. Sokoloff, and C. M. Valiejo-Roman</i>	41
Chromosome structures reconstruction <i>V. A. Lyubetsky and K. Yu. Gorbunov</i>	42
<i>D. yakuba</i> transcriptome reveals gene age-specific patterns of gene expression evolution <i>D. B. Malko, E. O. Ermakova, J. P. Dunham, G. A. Bazykin, A. V. Zaika, M. N. Arbeitman, S. V. Nuzhdin, and M. S. Gelfand</i>	43
Estimating population divergence time of Sakhalin taimen <i>Parahucho perryi</i> (Brevoort, 1856) <i>V. V. Malyar and V. A. Brykov</i>	44
Conserved sites in primary and secondary ITS1 structures of nuclear rDNA in bryophytes <i>I. A. Milyutina and M. S. Ignatov</i>	45
Molecular phylogeny and host specificity of copepods of the genus <i>Spaniomolgus</i> (Crustacea: Copepoda: Rhynchomolgidae), gall-inducing symbionts of the coral “laboratory-rat,” <i>Stylophora</i> (Scleractinia), the Red Sea <i>S. Moudrova, M. Nikitin, and V. Ivanenko</i>	46

Genetic structure of the brown trout <i>Salmo trutta</i> from the rivers adjoining the North-Eastern Black Sea <i>N. A. Nebesikhina, N. N. Timoshkina, A. E. Barmintseva, and S. B. Tuniev</i>	48
Secondary structure helps to align divergent ITS rDNA Crassulacean sequences <i>V. Yu. Nikulin and A. A. Gontcharov</i>	50
ITS rDNA as a highly informative marker for phylogenetic inferences in <i>Orostachys</i> subsection <i>Appendiculatae</i> (Crassulaceae DC.) <i>A. Yu. Nikulin and S. B. Gontcharova</i>	51
Multiple miR-1322 binding sites in mRNAs of paralogous and orthologous genes <i>R. Y. Niyazova, O. A. Berillo, S. A. Atambayeva, A. Z. Alybaeva, and A. T. Ivashchenko</i>	52
On the phylogeny of charrs of the genus <i>Salvelinus</i> : General conclusions from the analysis of mitochondrial DNA <i>A. G. Oleinik, L. A. Skurikhina, and V. A. Brykov</i>	53
DEPPDB portal v.3. Electrostatic and other physical properties of genome DNA and its elements <i>A. A. Osypov</i>	54
Electrostatic properties of transcription — related natural DNA palindromes-transcription factors binding sites and terminators <i>A. A. Osypov, G. G. Krutinin, E. A. Krutinina, and S. G. Kamzolova</i>	55
Electrostatics in genome DNA: Transcription regulation, evolution, DNA phenotype, and biophysical bioinformatics <i>A. A. Osypov, G. G. Krutinin, E. A. Krutinina, and S. G. Kamzolova</i>	56
<i>Neodasys</i> (Gastrotricha) belongs to Macrodasysida not Chaetonotida: Evidence from 18 and 28S rRNA gene sequences <i>N. B. Petrov, I. P. Vladychenskaya, V. V. Aleoshin, and O. G. Manylov</i>	57
Nuclear ribosomal DNA ITS region variability in the genus <i>Spiraea</i> from Asian Russia <i>T. A. Polyakova</i>	58

ISSR–PCR markers in evaluation of gene pool differentiation between and intra cattle breeds <i>Yu. V. Potiridi, D. M. Rihmaer, A. V. Khovankina, A. V. Arkhipov, V. I. Glazko, and G. Yu. Kosovsky</i>	59
Structural and phylogenetic analysis of mitochondrial genomes of Amphipods from Lake Baikal <i>E. V. Romanova, V. V. Aleoshin, K. V. Mikhailov, M. D. Logacheva, R. M. Kamaltynov, and D. Yu. Sherbakov</i>	60
Plastid genomes of <i>Seseli montanum</i> and <i>Pastinaca pimpinellifolia</i> <i>T. H. Samigullin, M. D. Logacheva, E. I. Terentieva, G. V. Degtjareva, and C. M. Valiejo-Roman</i>	61
Molecular phylogeny and biogeography of the genus <i>Abies</i> based on multiloci nuclear (AFLP) and cytoplasmic DNA sequence data <i>S. A. Semerikova and V. L. Semerikov</i>	62
The intraspecific divergence for the revertase-like sequences of cercariae of avian schistosome <i>Trichobilharzia szidati</i> <i>S. K. Semyenova, A. S. Guliaev, A. P. Yesakova, and G. G. Chrisanfova</i>	63
Evolution of mitochondrial genome structure on the first stages of eukaryotes diversification <i>E. A. Sirotnina and D. Yu. Sherbakov</i>	64
Some insights at the systematic and molecular phylogeny of the <i>Nipponacmea</i> species (Patellogastropoda, Lottiidae) <i>S. N. Sharina, A. V. Chernyshev, and N. I. Zaslavskaya</i>	65
Structural features of the nuclear ribosomal intergenic spacer region (IGS rDNA) in some species of Crassulaceae DC <i>V. V. Shokhrina and A. A. Gontcharov</i>	67
The fishes genotyping with nuclear repeated sequences <i>E. A. Shubina, E. V. Ponomareva, A. V. Klimov, and A. V. Klimova</i>	68
Phylogenetic relationships in superfamily Opisthorchioidea (Trematoda: Digenea) <i>Y. V. Tatonova, G. N. Chelomina, and V. V. Besprozvannykh</i>	69
DNA barcoding of fishes from Far East of Russia <i>S. V. Turanov, Yu. Ph. Kartavtsev, S. N. Sharina, V. V. Zemnukhov, A. A. Balanov, Y.-H. Lee, D. Jeong, and K. V. Rozhkovan</i>	70

<i>Helianthemum arcticum</i> (Grosser) Janch. from Kola peninsula (North-Western Russia): Endangered endemic species or just a geographical variety? <i>P. A. Volkova, I. A. Schanzer, B. Widén, E. Soubani,</i> <i>and I. G. Meschersky</i>	71
Selection of the microorganisms causing the healthcare-associated infections <i>O. L. Voronina, M. S. Kunda, E. I. Aksenova, A. N. Semenov,</i> <i>N. N. Ryzhova, V. G. Lunin, and A. L. Gintsburg</i>	72
Genomic landscape of cat domestication <i>A. A. Yurchenko, C. Driscoll, and S. O'Brien</i>	73
Molecular analysis of <i>Atraphaxis</i> (<i>Polygoneae, Polygonaceae</i>) based on ITS 1-2 and trnL-F data <i>O. V. Yurtseva, O. I. Kuznetsova, V. K. Bobrova,</i> <i>and A. V. Troitsky</i>	74
Evolution of noncoding RNAs in <i>Drosophila</i> genus genomes <i>E. V. Zhuravleva, E. D. Stavrovskaya, A. V. Favorov,</i> <i>and A. A. Mironov</i>	75
